

GRACIE

reddot design award
winner 2011

An innovative solution provided by BORCAD – integration of a colposcope in the GRACIE chair reduces spatial demands and increases convenience for the physician during the examination.

Integrating LCD monitor allows its connecting to an abdominal ultrasound and transfer of photo/video to PC.

Instrument Tray saves space in the surgery and provides for the physician's maximum convenience when working.

Heating of metal vaginal speculums.

Mobile wire-less foot controller for comfortable adjustment of an access, examination and ultra-sound position from any place within the doctor's surgery.

max. 10 m
